PROFESSIONAL SUMMARY

I am a Frontend Developer with 3 years of experience in the internet industry. I value teamwork and am known for being respectful, open-minded, and positive in my interactions.

I have developed strong skills in JavaScript, React, Angular, and GraphQL, and I have also gained hands-on experience with backend technologies such as NestJS, MongoDB, and SQL through close collaboration with my teammates.

In web development, I actively use state management libraries, component libraries, HTML, CSS preprocessors, RESTful APIs, browser developer tools, responsive design techniques, and performance optimization tools.

I also hold a Class B driver's license.

LANGUAGE

English: Proficient in both understanding and speaking. Capable of comprehending complex texts and engaging in conversations, expressing ideas effectively in simple sentences.

WORK EXPERIENCE

Junior Software Developer ,Colornic Reklam Ajansı

June 2022 – October 2024

- Developed custom React.js applications for a diverse range of clients, meeting individual project requirements and deadlines.
- Utilized React.js to create dynamic and interactive user interfaces, focusing on usability and user experience optimization.
- Collaborated closely with clients to understand their business objectives and translate them into technical requirements.
- Implemented responsive design principles to ensure seamless functionality across various devices and screen sizes.
- Integrated third-party APIs and services as needed, such as social media integrations and data visualization tools.
- Utilized Git for version control, facilitating collaboration and code management throughout the development process.
- Conducted thorough testing and debugging to ensure the stability and reliability of developed applications.

Junior Frontend Developer , VRSIS

October 2024 - Present

I played an active role in the development of large-scale projects as part of a team, utilizing Angular and NestJS to build modern and scalable web applications.

- Developed **dynamic and user-friendly interfaces** with **Angular**, focusing on optimizing the user experience.
- I collaborated with my team on developing a backend architecture using **NestJS** and **GraphQL**, contributing to the implementation of optimized data flow through queries.
- I supported the **MongoDB**-based database design and management processes, assisting in the development of systems working with large data sets.
- Utilized **Git and GitHub** for version control, facilitating seamless collaboration through **branching and pull request workflows**.
- Applied **responsive design principles** to ensure smooth functionality across different devices and screen sizes.
- Integrated **third-party APIs** and **data visualization tools** to enhance project functionality.
- Actively participated in **testing and debugging**, ensuring the reliability and performance of applications.

Through **effective communication and teamwork**, I contributed to the successful and timely delivery of projects.

PROJECT

Promotional Website : seraterra.com

- Designed and developed captivating user interfaces using React.js to showcase the benefits and features of herbal oils.
- Implemented interactive elements and engaging content sections to educate visitors about herbal oil benefits and applications.
- Collaborated closely with clients to capture their brand identity and marketing objectives, ensuring the website aligned with their vision.
- Leveraged modern frontend technologies to optimize website performance and responsiveness across various devices.
- Utilized Git for version control and JSON for data management in project development.
